

About Us

We aim to provide the construction industry with a wide range of services ranging from concrete technology, construction chemicals, material engineering services, training. We provide complete solutions for the construction industry by one-on-one connect with our customers. This helps us maintain confidentiality of our services. The Company has manufacture plant in Chennai and we have a technical and financially collaborated with Confix Singapore.

Our core management has extensive experience over a wide range of fields like project and company start-ups, valuation, technology identification, and feasibility studies. This experience comes from setting up, operating and managing manufacturing companies. The sound engineering background and international exposure of our core team, forms the basis of providing technical know-how in terms of developing high performance concretes, construction chemicals, application technologies (especially for waterproofing and repairs), laboratory set-ups and non destructive testing.

VISION

Our Vision is to thoroughly "Confix" the needs of our Customer to provide the most constructive solutions for the concrete construction and the construction chemical industry. We ensure Customer Satisfaction by bringing together a veritable portfolio of products and services to meet customer needs from start to finish on a project to create enduring value. Our Final Vision is to provide quality service for our financial upliftment, for mutual benefit of all associated with us and to enhance the quality of life of the people associated with our company.

MISSION

Our Mission is to educate the customers the uses and advantages of construction chemicals and use them in a cost effective way. To add value to clients through innovations, reliability, exceptional quality services and fosters an eco-friendly environment and thus encourages their participation and support in pursuing accurate application practices.

VALUES

Always accumulate experience to provide complete technical solutions to solve constructional and waterproofing problems. Our core value is creating the best value for our customer, the final end user and the project in general. We draw on a wide range of experience and contacts through the construction industry to provide the best possible service and collaboration to our customers. Finally integrity, trust and accountability, forms the basis of our value system.

INJECTION		
Product Name	Product Description	Packing
TOP Injekt 30	Two component high strength resin injecting for cracks, damp or wet concrete and also loose soil stabilization.	Part A:20 Ltrs Part B:20 Ltrs
TOP Acrylic Gel	Multi component Acrylic based hydro structural resin - gel type Highly flexible when cured. It used for Curtain injection, for injection into brick or masonry to seal the mortar joints against water ingress, and in tunnels, shafts and void injections.	60 kg
TOP Injekt 70	Two component solvent-free, low viscosity hydrophobic high strength based injection system when mixed in the proportions supplied it reacts rapidly with water to form a foam barrier. It can be used in Injection of Tunnels, Dams, Subway (Metro), and Sewers, Limestone, Manholes, Utility boxes and temporary dyke structures.	Part A:20 & 200 Ltrs Part B:20 & 200 Ltrs

ELASTOMERIC WATERPROOFING		
Product Name	Product Description	Packing
TOP Seal 100	Two component High Flexible Cementitious, Elastomeric Waterproofing System for roofs, balconies and decks Sealing and protection of bridge decks, tunnels, swimming pool etc.,	A: 20 kg B : 10kg

REPAIR & STRENGTHINING SYSTEM		
Product Name	Product Description	Packing
TOP SBR	Polymer Modified Cementitious used for concrete/plaster repairs, waterproofing treatment in basement, roof, underground and overhead reservoir.	20 Ltr
TOP Plug	Stops active water or seepage under pressure through joints, cracks and holes in concrete or masonry for temporary.	5 kg,25 kg
TOP Grout 60	Non shrink cementitious grout for structural grouting of column base plates, machine base plates, anchor rods, Bearing plates, etc.	25 kg
TOP Crete 66	High strength shrinkage compensated repair mortar for concrete. Repairs to bridges, tunnels, garages, silos, Jacketing of beams, columns and other structural elements for strengthening.	25 kg
TOP Crete 80	Ready-mix and non-shrinkage trowelable fibre reinforced thixotropic repair mortar cement base dry powder, provides smooth level surfaces with highly consistent repair mortar for Special purpose concrete and masonry repairs.	25 kg
TOP Flowcrete	Grout admixture for all cementitious mixes where restrained expansion is required. Typical uses are under-plate and bed grouting, space grouting, duct grouting and anchor bolt fixing.	250 Gms and 5 kg
TOP Grout EP	Solvent free three component Low exothermic, flowable epoxy resin grout. Used for structural anchoring of bolts, inserts and reinforcement.	20 kg
TOP Grout LV	Two component solvent free Low Viscous epoxy injection resin grout. Used for injecting into cracks, beams, columns, walls and structures honeycombs and cavities in concrete structures.	Part A:10 Ltr Part B:5 Ltr

PROTECTION SYSTEM		
Product Name	Product Description	Packing
TOP Protect DW	Epoxy resin coat for internal protection of concrete tanks containing drinking water, certain chemicals, oils and fuel.	5kg

Hybrid PU / LIQUID APPLIED WATERPROOFING		
Product Name	Product Description	Packing
TOP Ziproof 140	Two component hybrid polyurethane spray for general waterproofing applications such as podium and car park decks, tunnel lining, foundation, basement, green roofs, truck bed lining, and waste water tank line.	A:200 ltrs B:210 ltrs
TOP Sealroof 104	Single component polyurethane membrane system provide an easy, fast and sure system for waterproofing and protection of New roofs, Balconies, terraces, parking garages, asbestos, concrete roofs, basements and Planter area.	25 kg

ADMIXTURE		
Product Name	Product Description	Packing
TOP Plast IP	Integral Waterproofing Compound for concrete in Tunnels, Basements, Balconies, Canals, Water tanks, Precast, Inspection chambers, Sumps, Concrete walls, Manholes and Swimming pools.	5 and 20 Ltr
CON Plast SP	High performance concrete polycarboxylic based super plasticizer admixture it is based on a unique carboxylic ether polymer with long lateral chains.	5,10,20 Ltrs
CON Rheoplast NSP	Naphthalene sulfonate based, high water reduction, super plasticizing (improves concrete flow properties) concrete admixture which improves early and ultimate strength of concrete and provides rheoplastic features of the concrete.	5,10,20 Ltrs

PRIMERS		
Product Name	Product Description	Packing
TOP Bond EP	High strength solvent free epoxy mortar for Concrete elements, mortar, bricks, blocks, masonry ,joint and crack filling	6 kg
TOP Prime ER 40	Two component epoxy primer for Flooring and screed applications, maintenance of old civil structures.	60 kg (Base&Hardner)

WATERPROOFING MEMBRANE		
Product Name	Product Description	Packing
TOP Prufe plus 1200 (HDPE)	For basement structure waterproofing membrane for retaining walls, raft, etc...	20 m ² /40m ²
TOP PVC	Non-reinforced geomembrane for tunnels and basement works.	Delivery in roll form, 2.15 * 20 meter

EXPANSION & CONSTRUCTION JOINT SYSTEM		
Product Name	Product Description	Packing
TOP Polyband	Rubber tape with alkali resistant fabric for cementitious waterproofing systems and liquid membrane.	50 m roll
TOP Swelbar	Expansive hydrophilic waterproofing strip for sealing horizontal and vertical construction joints/concrete to steel joints in underground projects.	Delivery in roll form, 15 meter
TOP Re-Injekt Hose	Grouting tube for injection with cement or polyurethane water stop materials. Is a re-injectable plastic injection tube that could be embedded in the joints during construction	Customized
TOP Flextape	High performance sealing tape for expansion and construction joints as well as cracks. The bond to the substrate is achieved using a suitable adhesive.	20m length
